

Cover Letter – Pavithra Subramaniyam

Dear Recruiter,

If you are looking for a young passionate developer with interest in **Full-stack**, then you might have just found the right profile. I'm Pavithra Subramaniyam from Tampere. With a Master's degree in Cloud-based Software Engineering and ~3 years of hands-on experience working with React.js, Typescript, Node.js, AWS cloud, CI/CD pipelines and Junit/Jest test frameworks. I'm also a freelancer doing e-commerce projects with an aspiration to become Senior Full-stack developer/ Software Architect.

As you're looking for a developer with solid experience in **modern JavaScript Frameworks (React.js, Node.js, Angular, Typescript), SQL, CI/CD and AWS cloud**, I would like to showcase my fitness for this role. I have worked extensively with Angular, Typescript for developing and debugging complex web applications and its user interface at Neuro Event Labs Oy. Implementing DevOps and AWS serverless cloud infrastructure were my expertise when working with Newelo Oy. Front-end technologies like HTML, CSS, React, Typescript + backend technologies like Node.js, python, AWS EC2 + DynamoDB, PostgreSQL and MySQL databases were my primary skillset to make responsive, scalable and aesthetic web applications in my work experiences and course projects. Thus I can take on the projects immediately. I have used Junit and Jest for testing my code during my thesis. My expertise with AWS cloud tools, Terraform, serverless framework, GitLab CI/CD, Docker, API design, code reviews can also boost the software development for your company.

I enjoy solving complex problems (good at math), process improvements, and creating seamless user experiences. With a strong foundation in full-stack development and cloud, I look forward to bringing my expertise to your team and contributing to aesthetic user experience. Location or pay is secondary as I'm primarily looking for a **wider responsible role for a longer duration**. Ready to join immediately. Kindly check my profile
