

Pavithra Subramaniyam

Software Developer | Freelancer

With a great motivation, I'm applying for the Software developer position listed in your organization. I'm from India, did my **Bachelor's** degree in electrical major. I have worked as supply chain management mentor in Amazon - India, for about 6 years across Europe and North American divisions. I have completed a Full-stack development diploma course in Tampereen Ammattikorkeakoulu (TAMK). Also, completed my **Master's degree** in Cloud-based Software Engineering offered by Vaasan Ammattikorkeakoulu (VAMK).

I was working as a Junior Software Developer in Neuro Event Labs Oy before getting laid off. I have been working with front-end, back-end for web applications in Neuro Event Labs Oy. Then, I was working with Newelo Oy as RekryKoulutus and finished my Master's thesis. I was working with AWS environments and deployments for Ideapark's web page and thesis work for Newelo Oy. Also practicing freelancing in my free time for more than 6 months, where I worked on React front-end and PHP back-end. My strong knowledge areas are AWS (Lambda, EC2, S3, DynamoDB, Cloud Architecting), front-end, back-end, CI/CD pipelines. My course works are in GitHub repositories (link in portfolio/footer). Now, I am a mother of an 8-month old kid.

Based on your job description, I am more excited about the opportunity to work with JavaScript, React, Node.js, and AWS to build efficient and scalable applications. I enjoy solving complex problems (good at math), process improvements, and creating seamless user experiences. With a strong foundation in full-stack development and cloud architecture, I look forward to bringing my expertise to your team and contributing to meaningful projects.

I have always delivered the best, whatever I was assigned in my previous roles. I am seeking a challenging work experience, more than a well-paid job where I can mould myself as a better developer in all aspects. My working experience with Amazon, Neuro Event Labs and Newelo have given me the ability to handle pressure, also to imbibe an accelerated learning phase. Location or pay is secondary as I'm primarily looking for a wider responsible role. Kindly check my profile.
